

ANSHI TYAGI

Computer Science Undergraduate | Artificial Intelligence & Machine Learning

+91 9761709080 | tyagianshi2005@gmail.com | linkedin.com/in/anshityagi | github.com/TyagiAnshi

PROFILE

AI/ML-focused computer science undergraduate with hands-on experience across anomaly detection, regression modeling, classification, data analysis, model evaluation, Flask REST APIs, and Streamlit dashboards. Brings a practical project portfolio with measurable outcomes and a clear habit of technical documentation and reliable delivery.

0.9583

ROC-AUC in turnover prediction

88.15%

Classification accuracy achieved

0.87

R-squared salary model score

PROJECT HIGHLIGHTS

Credit Card Fraud Detection System

Built an anomaly detection and classification pipeline on 284,000+ transaction records using Isolation Forest, LOF, XGBoost, SMOTE, and Streamlit visual scoring.

Smart Salary Predictor

Created a full-stack ML app with Flask REST API and Streamlit front end, benchmarking 5+ regression algorithms and surfacing real-time analytics.

Employee Turnover Prediction System

Delivered preprocessing, feature engineering, cross-validation, model comparison, API endpoints, dashboard workflows, and feature-importance views.

CORE STRENGTHS

- Machine learning workflows: preprocessing, feature engineering, model training, evaluation, and interpretation.
- Python ecosystem: scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Flask, Streamlit, MySQL.
- Computer science foundation: DSA, OOP, DBMS, operating systems, software engineering, and networks.
- Professional habits: collaboration, stakeholder communication, technical documentation, ownership, and adaptability.

EDUCATION & CURRENT ROLE

Machine Learning Intern - Elevate Labs

Apr 2025 - Present

B.Tech in Computer Science and Engineering, AIML
JSS Academy of Technical Education, Noida

Oct 2023 - Present | 7.9

TECHNICAL TOOLBOX

Python

C++

SQL

scikit-learn

Pandas

NumPy

Flask

Streamlit

GitHub

Model Evaluation

Feature Engineering

Cross-Validation
